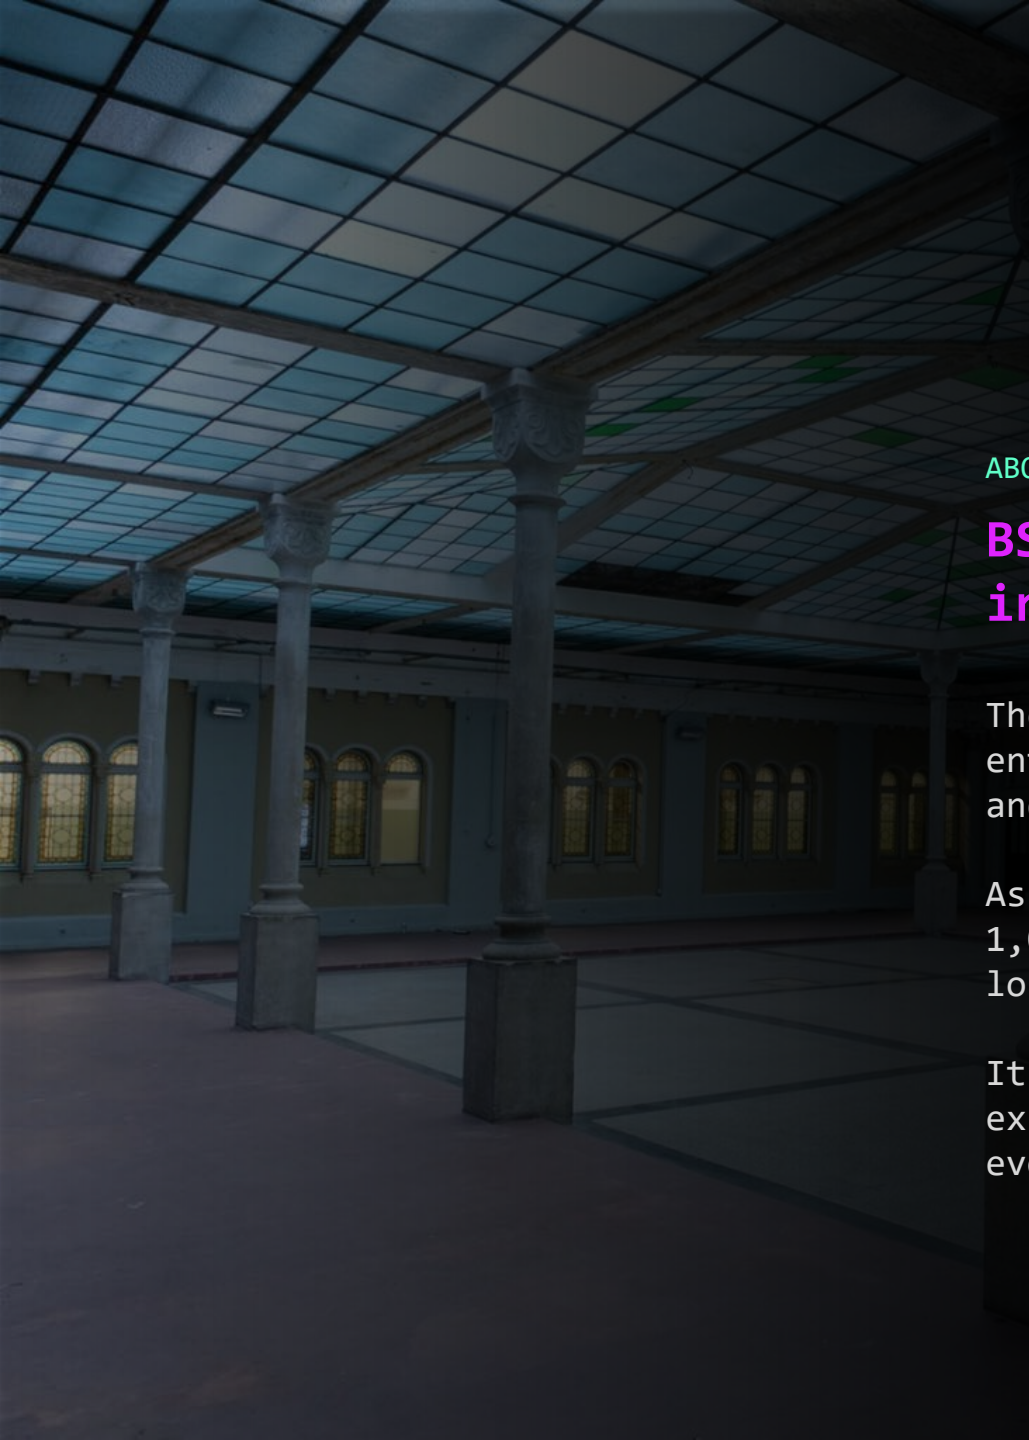
BSides Prague 2025

April 3-4, 2025 | Prague

bsidesprg.cz



ABOUT

BSides Prague is an annual community-driven information security conference held in Prague.

The event provides a platform for cybersecurity professionals, enthusiasts, and researchers to share knowledge, exchange ideas, and discuss the latest trends in the field.

As part of the global Security BSides movement, which includes around 1,000 chapters worldwide, it also provides an opportunity for the local community to engage with professionals from across the globe.

It’s a unique opportunity to connect with like-minded individuals, expand professional networks, and stay informed about the ever-evolving cybersecurity landscape.

BSIDES PRAGUE

Vangelis Stykas

Co-founder & CTO @ Atropos | API security researcher | Infosec speaker

A father of the idea & opening speaker

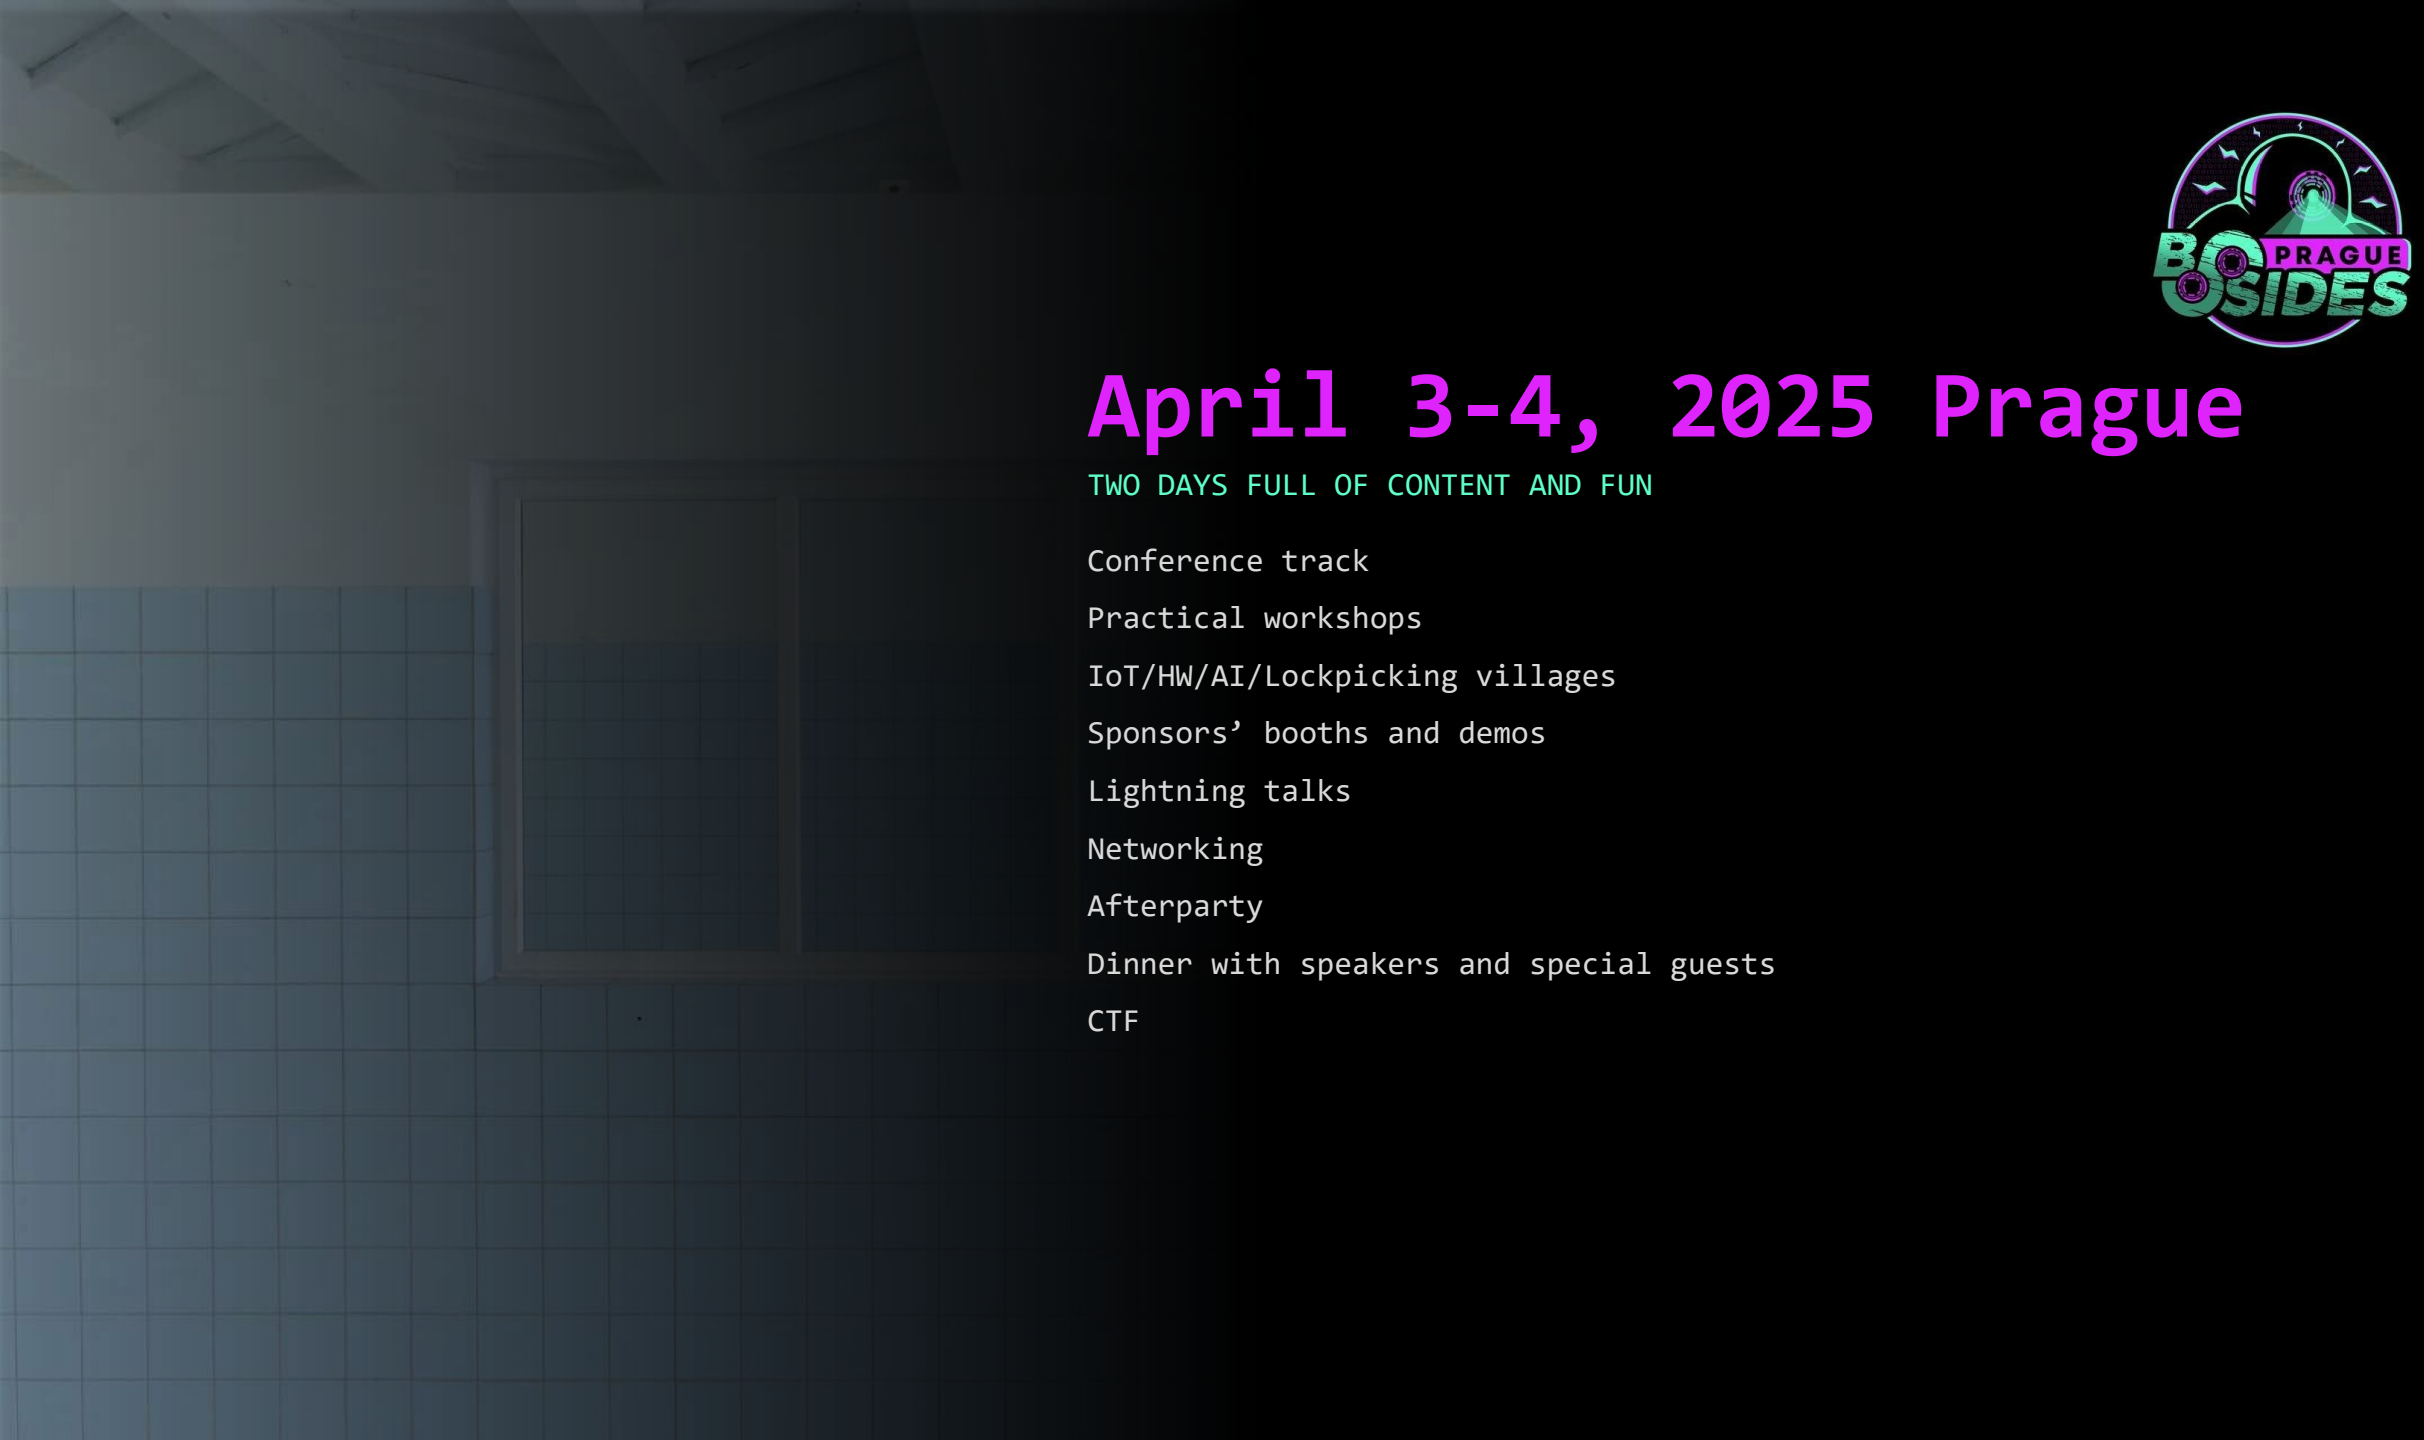
Martin Hron

SentinelOne staff offensive security researcher, technology lover, white hat hacker and coffee makers breaker

CONFERENCE THEME

Evolution to Revolution

We are living in exciting times where the future approaches us non-linearly every single day. As we progress in technology, each step we take becomes longer and more impactful. However, it’s important to remember that every single invention or significant leap in history started as an evolution over time, gaining critical mass until one day it flipped into a revolution. The pace of progression speeds up, and this is especially true for the computer industry. But with great progress comes great responsibility. As the pace of innovation accelerates, we must stay sharp and vigilant to ensure that this revolution leads to balanced and responsible growth. By anticipating and mitigating risks before they become problems, we can shape a future that is not only groundbreaking but also secure and sustainable.



April 3-4, 2025 Prague

TWO DAYS FULL OF CONTENT AND FUN

Days 1-2
9:00 – 18:00

Afterparty
Day 2
18:00 – 22:00

Gabriel Loci

Holečkova 106/10, 150 00 Praha 5-Smíchov

Gabriel Loci, a remarkable venue blending historical charm with contemporary innovation, stands as a testament to Prague's rich cultural heritage and its embrace of modern trends. Nestled in the historic Smíchov district, this architectural gem has been transformed from a monastery into a vibrant hub for art, events, and cutting-edge technology. Its meticulously restored spaces preserve the timeless beauty of its 19th-century origins, while hosting modern exhibitions, creative conferences, and innovative projects that celebrate the intersection of tradition and progress. Gabriel Loci isn’t just a place—it's an experience where history and the future converge, creating an inspiring backdrop for forward-thinking ideas and transformative connections.

A one of a kind community event Security BSides Prague took place in Prague in April for the first time, and I must say it's been a blast! From excellent content-rich #security & #hacking talks to interesting conversations or catching up with friends from the #cyber community to the unusual cyberpunk afterparty, I don't think there's been a #conference I would enjoy this much!

In the fast-paced world we live in, it's important to remember that life isn't always about business. From time to time, we must take a step back to contribute to the greater good and uplift our communities.

With this in mind, I am proud to share that I am part of the Security BSides Prague conference organization. This initiative is close to my heart as I believe that fostering a strong community, a norm in other countries, is something we're still building upon in Czechia.

At Noibit, we recognize this need, and we are not just participating, but also sponsoring this event. We firmly believe that our role in society extends beyond business. It's about making a difference and contributing to the development of a vibrant community.

I've enjoyed myself at Security BSides Prague which was my first security conference since my move to Prague. The hosts did an amazing job setting everything up for everyone and accommodating participants.

I am grateful to the participants that also came to my talk.

The Hot Take Challenge, hosted by ELLIO Technology, was definitely unforgettable (especially the lingering 30-45 minute feeling from the last hot sauce).

Hey network! If you are one of my connections that is in Prague, be sure to consider Security BSides Prague conference next week -- long awaited manifestation of widely-known epic infosec events in this amazing city!

Lots of awesome talks, with non-formal discussions. Humble to join speaker line, discussing potential of self-supervised techniques for cyber-sec needs! #bsidesprague2024 #infosec #ai

It all started a couple years ago when Sarka .. introduced me to BSides, infosec conferences driven by the attendees. Back then, I would never have guessed that a couple years down the line, I would join the organizational team and give my best to support Security BSides Prague!

Huge thanks to Martin Hron for giving me this opportunity!
